

Infection Prevention & Control (IPC) Services

Because safety starts with people—not just protocols.

At **AIDA Health Advisory Group**, we deliver tailored IPC services that go beyond training—supporting healthcare facilities with on-site implementation, systems strengthening, and staff empowerment.

Our team works hand-in-hand with healthcare workers to prevent infections before they start—on the ward, in the community, and even at home.

■ Cleaner support – safe PPE removal & surface cleaning coaching.

■■ Nurse isolation workflows – practical solutions in low-resource settings.

■■■■■■■■■■ Hospital-wide readiness checks – with our IPC Champion Program.

■ Culturally aware support – aligned with Somali norms & Islamic values.

What Makes AIDA's IPC Services Different:

- Action-based, not just policy-driven
- Rooted in international standards and WHO guidelines
- Respectful of Islamic values and Somali cultural practices
- Focused on long-term systems change and hospital performance

Need expert IPC support? Partner with AIDA Health Advisory Group to protect patients, staff, and communities from preventable infections.
